Relación de Ejercian 1.

19 Estudiar el comportaniento en tos de la función f:A→IR, en coda uno de los siguientes casos:

a)
$$A = IR^{+}$$
, $g(x) = (a^{x} + x)^{\frac{1}{x}}$, $a \in R^{+}$

$$\sigma) \quad \begin{cases} (x) = (\sigma_x + x) \frac{x}{\sqrt{x}} \end{cases}$$

Para ortudiar el comportamiento en 100 de f(x1 vo) a ortudiar el limite cuando x tiende a +00 de f(x1:

$$\lim_{x\to\infty} f(x) = \lim_{x\to\infty} (\alpha^x + x)^{\frac{1}{x}}$$

Simulitationer par too par queda: (a + a) = 0 =) Indeforming

Rondvemon la indeterminación.

Para ello, vamor a expresar f(x) de era forma equivalente:

$$g(x) = (\alpha^x + x)^{\frac{1}{x}} = e^{\ln(\alpha^x + x)^{\frac{1}{x}}}$$

A continuación tomomon limiter:

10.11 = 1) 30

$$\lim_{x\to\infty} \frac{\ln(\alpha^x + x)^{\frac{1}{x}}}{\ln(\alpha^x + x)^{\frac{1}{x}}} = \lim_{x\to\infty} \frac{\ln(\alpha^x + x)}{\ln(\alpha^x + x)^{\frac{1}{x}}} = \lim_{x\to\infty} \frac{$$

Aplicamon a continuación un cerdano de la 22 Regla de d'Hôpital

$$\lim_{x\to\infty} \frac{\ln(\alpha)^{d} \alpha^{x}}{\ln(\alpha)\alpha^{d}+1} = \lim_{x\to\infty} \frac{\ln(\alpha)^{3} \alpha^{x}}{\ln(\alpha)^{2} \alpha^{x}} = \lim_{x\to\infty} \frac{\ln(\alpha)}{\ln(\alpha)^{2} \alpha^{x}} = \lim_{x\to\infty} \frac{\ln(\alpha)}{\ln(\alpha)^$$

b).
$$A = \int 1$$
, $+\infty \int \int (x) = \frac{x(x^{\frac{1}{x}}-1)}{\log x}$

En ente cono, precedemon como en el rej. anterior a hallar el limite cuando $X \to t\bar{o}0$ de f(X)

$$\lim_{x \to i\infty} \int_{X} \frac{1}{x} \frac{1}{x} = \lim_{x \to i\infty} \frac{1$$

Retomanno en =)
$$e^{\frac{\ln \alpha}{x+100}} \frac{\ln(\alpha)\alpha^{x}+1}{x} = e^{\frac{\ln \alpha}{x+100}} \frac{\ln(\alpha)\alpha^{x}+1}{\alpha^{x}+x}$$

Aplicanos 2° R. d'Hôpital

$$= e^{\lim_{x \to \infty} \frac{\ln(a) a^{x} + 1}{a^{x} + x}}$$

$$= e^{\lim_{x \to \infty} \frac{\ln(a) a^{x} + 1}{a^{x} + x}}$$

$$= e^{\lim_{x \to \infty} \frac{\ln(a) a^{$$

En definitive, me quede =)
$$e^{\frac{0+1}{0+\infty}} = e^{\frac{1}{\infty}} = 0$$

A continuación, aplico la Regla de d'Hôpital ya que adama onte ena indeterminación de la forma - :

$$\lim_{x \to \infty} \frac{1}{x^{x}} = \frac{1-1}{0} = \frac{0}{0}$$

A continuación, deivo numerada) denominadar y compuebo el limite

$$\lim_{x \to \infty} \frac{\frac{1}{x}}{\frac{\ln x}{x}} = \lim_{x \to \infty} \frac{\frac{1}{x}}{\frac{1 - \ln x}{x^2}} = \lim_{x \to \infty} \frac{\frac{1}{x}}{\frac{1}{x^2}} = \infty$$
Troughn

Tomo logacitmo
$$\Rightarrow$$
 In $h(x) = \ln x^{\frac{1}{x}} = \frac{1}{x} \ln x$

Derivo ambor miembra 3)
$$\frac{R'(x)}{R(x)} = -\frac{1}{x^2} \ln x + \frac{1}{x^2}$$

$$h'(x) = \frac{x_5}{1-l\sqrt{x}} \times \frac{x}{4}$$

$$\Rightarrow \text{ Renduemon } \infty^{\circ} \Rightarrow \lim_{x \to \infty} x^{\frac{1}{x}} = \lim_{x \to \infty} e^{\lim_{x \to \infty} x} = \lim_{x \to \infty} e^{\lim_{x \to \infty} x}$$

"="
$$e^{\frac{1-\ln(x)}{x}} = e^{-1}$$
